

Governmental Services

Governmental operations require stewardship and stakeholder consensus to comply with agency requirements, maintain project momentum, and respond with scalable solutions.

Our staff works with local governments from across the United States as an extension of their staff, providing a broad range of local government engineering, municipal advisory services, project/program management, construction management, inspection, and public works staff augmentation.

HR Green takes a big-picture, programmatic approach and brings a one-stop consulting solution for your governmental service needs. We are at the forefront of leveraging industry-recognized thought leadership, registered/certified professionals, alternative service delivery options, proven best practices, and cutting-edge technology to save time and money, enhance operational efficiencies, procure funding, and create/implement a road map to future success by delivering long-term sustainability.

Our creative and innovative leaders develop unique and flexible approaches for various initiatives to help the communities they serve.

GOVERNMENTAL SERVICES

► Local Government Engineering

We are the Municipal Engineer and/or Public Works Director or part of the Engineering and Public Works department for communities throughout the nation with populations ranging in size from less than 5,000 to 100,000+ residents. This broad experience has allowed us to build long-term partnerships with public agencies and regional stakeholders throughout the United States.

We can leverage our vast operational experience and help your municipality with short- or long-range planning; capital plans; turn-key conceptual planning and design through construction; and various day-to-day operations.

► Municipal Advisory Services

Government agencies are turning to a broad spectrum of municipal advisory services to provide solutions to internal staff shortages, complex budgeting processes, smart/virtual city initiatives, changing permitting regulations, managing your assets, and alternative project delivery methods.

HR Green's staff includes former public sector employees and diversely-skilled personnel who have served in a staff augmentation role who understand the priorities and processes of governmental clients and the agencies.

From capital improvement projects, promoting transparency, procuring funding, maximizing your assets, smart city, and broadband initiatives, organizational/operational efficiency, and long-range planning and implementation, HR Green's professionals provide nimble, on-demand services.

► Building + Code

Our deep bench of code officials, engineers, architects, ICC-certified staff, and code instructors provide your agency a single source solution to process, review, inspect, and approve new construction and improvements. Our knowledge and best practice tools are ideally suited to deliver the highest quality services within your budget, with optimal efficiency of staff to meet permit activity workload, or provide additional flexibility with virtual inspection services.

► Electronic Plan Check

We specialize in providing “green,” paperless electronic plan review and tracking solutions, where reviews and comments are accessible electronically. These tools maximize collaboration and expedite requests while eliminating printing, shipping, storage, and travel costs. By using an electronic plan review process, you can reduce turnaround review schedules between 20-40% and increase transparency and collaboration.

We perform comprehensive civil and building plan reviews on a wide variety of roadway, water, and sewer improvements as well as developments, such as business, commercial, industrial, multi-family, townhomes, condominiums, universities, single family homes, and others.
