

GOVERNMENTAL SERVICES

We combine creativity with reliability to assist local governments in achieving their goals for service delivery, infrastructure management, and sustainable development.

Our governmental service professionals combine creativity with reliability to provide staff augmentation and consulting services to local governments.

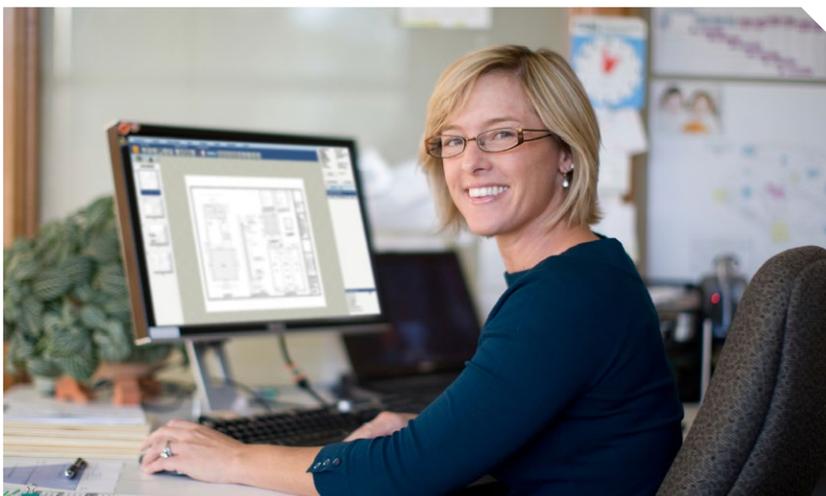

We provide administration, engineering, public works, planning, and building departments with staff to meet the variable workloads without the normal long-term costs.

Our creative and innovative solutions are scalable and tailored to fit a client's needs, whether it is a rapid response to an immediate challenge, or a broader need directed at implementation of a longer-term solution.

These innovative solutions have been successful in helping governments address their most

significant issues: increasing revenue without increasing taxes; helping to efficiently manage their programs; and assisting in providing a high level of service to their constituents.

Our creative and innovative leaders develop unique approaches for various initiatives to help the communities they serve.

APPLYING CREATIVITY AND INNOVATION TO LOCAL GOVERNMENTS

We understand local government challenges and our insightful staff continuously seek new innovations and technologies that offer long-term solutions, or discover underdeveloped assets for generating new revenues.

▷ **GOVERNMENTAL SERVICES**

▪ **Municipal Engineering + Public Works**

We work with local governments as an extension of your staff, providing municipal engineering services, on-call consulting, and public works staff augmentation.

▪ **Program Management**

Government agencies are turning to program management to provide solutions to internal staff shortages, complex budgeting processes, changing permitting regulations and alternative project delivery methods. Our program management staff provide you with on-demand access to additional knowledge and capacity.

▪ **Broadband**

Beginning with envisioning an approach, and then planning, design, construction, and operations, we specialize in providing public agency program management to help you navigate through all phases of your municipal broadband implementation.

▪ **GIS + Asset Management**

Stretch your infrastructure funding by identifying the most economical repair method to a specific infrastructure asset based on its condition and importance to the overall system. Our staff also develop GIS applications which make municipal operations more efficient.

▪ **Brownfields Redevelopment**

Brownfields can adversely impact human health, decrease the value of surrounding properties, deter potential investments, and represent a significant safety hazard to the community if left unaddressed. HR Green is dedicated to helping communities identify and secure funding, formulate and develop planning goals, community vision, and redevelopment strategies.

▪ **Plan Check**

We perform comprehensive civil and building plan reviews on a wide variety of roadway, water, and sewer improvements as well as developments, such as business, commercial, industrial, multi-family, townhomes, condominiums, universities, single family homes, and others. Additionally, we specialize in providing a paperless electronic plan review and tracking solution called *HR Green Check* where reviews and comments are accessible electronically.

▪ **Building Department Services**

With an average 20+ years of experience, we can quickly mobilize qualified engineers, architects, certified building officials, accessibility specialists, ICC-certified plan reviewers, inspectors and counter staff.

▪ **Staff Augmentation**

We specialize in providing staff augmentation to municipalities to assist in service delivery. We provide our clients with highly qualified staff, on a short or long term basis, to meet their workload demands.
