ELECTRONIC + PLAN REVIEW

Proven Tools + Review Process

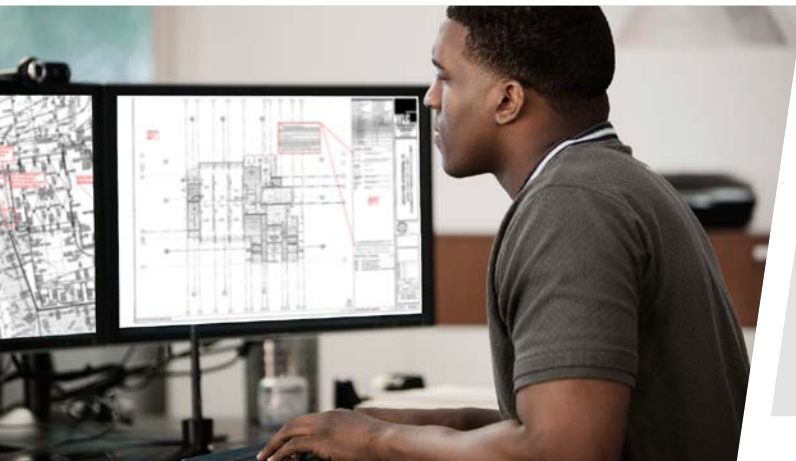

The HR Green plan review team provides helpful code insight, responsiveness, and collaboration early and often. We leverage a proven development review process and plan review tool with digital commenting that maximizes efficiencies, promotes project transparency, saves time and money, enhances collaboration, streamlines communication, and improves service delivery.

Our plan reviewers are proficient in using various electronic plan review systems, such as Newforma and Bluebeam Revu, and we can seamlessly integrate with your municipality's system and process. We can even work with you and on how to best transition to a paperless or hybrid environment.

Along with required technical skills and experience appropriate to your projects and schedule, your HR Green team learns your processes, works alongside your staff, and becomes part of your culture - bringing thoughtfulness and flexibility. Our knowledge and understanding of municipal services are beneficial if internal and external agencies coordination is needed.

Added Value

- One electronic copy posted to the dashboard
- Plans routed to an available HR Green reviewer
- Comments are embedded on the drawing
- Document approval completed with electronic signature
- Complete "Green": No paper waste or storage needs

HR Green has implemented the most appropriate proven best practice tools and technologies to reduce paper, save time and money, enhance collaboration, and streamline communication and service delivery.
