Concept Through Completion

At HR Green, we believe in a collaborative, process-oriented design approach. We consider the natural and historical characteristics of a site and focus on exceeding your goals and objectives through constructible designs.

This philosophy defines our approach to a wide range of public as well as private improvements, including parks, streetscape, campuses, trail systems, and building sites.

We consider the natural and historical characteristics of a site and focus on exceeding our client's goals and needs through constructible and maintainable designs.

Once we fully understand the project requirements and your objectives we begin thoughtful design development, blending creative talent with sound business sense to meet the established budgets and schedules. We serve both public and private clients in this manner, bringing flexibility, responsiveness, and a hands-on approach to every project.

Our licensed landscape architects utilize various plant materials to create, define, enhance, and control exterior spaces. We use our horticultural experience to select the right plants for the right condition and place them where they can thrive. We develop visioning and theming that create a "sense of place" and differentiate your projects from your competitors.

Clients trust HR Green to develop visioning and theming that create a "sense of place" and differentiate projects through the use of landscape architectural elements, architectural control, and site furnishings.

We also collaborate and assist our public and private clients in developing funding strategies for landscape architectural projects.

LANDSCAPE ARCHITECTURAL SERVICES

▶ **Planting Design**

Our licensed landscape architects utilize various plant materials to create, define, enhance, and control exterior spaces. We use our horticultural knowledge to select the right plants for the right condition.

▶ **Parks + Recreation**

Our staff of licensed landscape architects and planners are experienced in the layout and design of both active and passive park facilities ranging from picnic areas and fishing piers to athletic facilities, playgrounds, and trail systems.

▶ **Streetscapes + Parkways**

Through the use of landform enhancement, landscaping, lighting, customized signage programs, and hardscape elements, we create unique streetscape environments to improve vehicular and pedestrian experiences.

▶ **Environmental + Sustainable Design**

Our teams are led by LEED Accredited Professionals who design solutions that reduce impacts on the environment, require less long-term maintenance, and produce positive environmental and economic results.

▶ **Blueways + Riverwalks**

Rivers, streams, and canals are valuable public assets within our communities. Our landscape architects and design professionals provide planning and design to protect, preserve, and enhance these natural open spaces.

▶ **Visioning + Theming + Branding**

We develop themes that define and create “sense of place” and communicates our client’s vision. This practice differentiates our clients’ projects from their competitors, through landscape architectural elements, architectural control, and site furnishings.

▶ **Signage + Monumentation + Wayfinding**

We design and create strategic signage plans and wayfinding systems to guide pedestrians and vehicular traffic through communities, urban spaces, and green corridors. We create monuments that mark community or commercial gateways and convey unique design elements and character to the visitor.

▶ **Grant Preparation + Funding Strategies**

We collaborate and assist our clients in developing funding strategies for landscape architectural projects. Our grant preparation experts evaluate opportunities and prepare applications that secure funding to turn our plans into reality.
