

Building Communities.
Improving Lives.

▶ HRGREEN.COM

Certified + Knowledgeable Inspectors

HR Green has a consistent roster of International Code Council (ICC) Certified Inspectors with in-depth field knowledge to perform building inspections for municipalities Nationwide. We are incredibly proud of our in-house capabilities, which include certifications in all building disciplines.

▶ Onsite Consultations

Our Inspectors can conduct inspections of all trades to verify that the project complies with approved plans, specifications, and applicable codes and ordinances. Inspectors and staff can provide onsite consultations to residents and contractors to determine areas of non-compliance. Our inspectors also educate and inform residents and contractors to gain compliance and keep projects on track.

▶ Electronic Documentation

At your request, we also provide electronic documentation, record all inspections, including your results, and track their status for compliance. If requested, an HR Green Permit Coordinator can assist you with scheduling as needed.

▶ 24-Hour Emergency Response

In addition to meeting scheduling requirements, our inspectors will provide 24-hour Emergency or After-Hour assistance as requested by emergency or municipal personnel. We can provide the necessary contact information to include on an Emergency Call Chain List.

Inspection Services

- Building
- Mechanical
